

ETHAN HUNT

Full Stack Developer | JavaScript Expert | Innovator

+44 20 7123 4567 Email linkedin.com Reading, UK

SUMMARY

Experienced full stack developer with over 3 years in producing high-performance web applications using JavaScript. Proven success in enhancing software processes, resulting in a 30% efficiency gain. Passionate about cutting-edge technologies.

EXPERIENCE

Full Stack Developer 03/2021 - Present
ThoughtWorks London, UK

- Spearheaded the development of high-performance enterprise web applications, increasing client satisfaction ratings by 25% within the first year.
- Led a team of 5 developers to redesign an application architecture, enhancing code maintainability and reducing bugs by 40%.
- Integrated Next.js into existing React projects, improving application speed by 20%, supporting strategic company goals.
- Conducted rigorous code reviews and testing practices, which resulted in a 15% decrease in production bugs.
- Collaborated with cross-functional teams to implement agile practices, which accelerated project timelines by 10%.
- Pioneered advanced caching strategies using Redis, resulting in a 50% reduction in application load time.

Software Engineer 05/2018 - 03/2021
IBM Manchester, UK

- Developed consumer web applications using React and Node.js, consistently exceeding user engagement benchmarks by 30%.
- Improved server-side rendering processes, which resulted in a 20% faster data retrieval across cloud platforms.
- Mentored junior developers in adopting best coding practices, enhancing team productivity by 15% annually.
- Optimized APIs for better performance, reducing API call times by an average of 200ms across all services.
- Integrated modern JavaScript tools such as TypeScript, enhancing project build processes and reducing compile time by 10%.

Web Developer 02/2016 - 04/2018
Accenture Birmingham, UK

- Built and deployed scalable web applications, raising user retention rates by 15% during the first rollout.
- Successfully implemented HTTPS throughout the platform, significantly boosting site security and client trust.
- Devised a modular front-end framework using Angular, effectively reducing development time for new pages by 20%.
- Analysed and addressed data storage issues, optimizing SQL queries and improving database performance by 10%.

EDUCATION

Master of Science in Computer Science 01/2015 - 01/2016
University of Oxford Oxford, UK

Bachelor of Science in Software Engineering 01/2012 - 01/2015
University of Reading Reading, UK

PROJECTS

Realtime Chat Application

An open-source web application implementing WebSockets for live communication using Node.js. [github.com/realtime-chat-app](#)

API Performance Dashboard

An open-source project to monitor and visualize API performance metrics using React and Next.js. [github.com/api-performance-dashboard](#)

KEY ACHIEVEMENTS

🚀 **Boosted Application Performance**
Enhanced web application speed by 30% through comprehensive refactoring of existing codebase, increasing user engagement.

🚀 **Improved Development Efficiency**
Implemented agile methodologies that reduced project turnaround time by 15%, meeting client deadlines consistently.
